Istanbul.

Dear Professor,

On August 1960 I sent a letter to you requesting you to kindly join the HUNGARIAN UNION as a diplomatic observer.

In this regard I mentioned in my letter the name of our president, professor Dr. Edmund Málnási, who authorized me to write to you. Professor Málnási also mentioned to have met you personally on October 18 and 22 last year and since I did not obtain any reply from you I have to assume that you did not receive my previous letter.

The Hungarian Union is a working unit of Hungarian top experts who prepare the liberation of Hungary in a quite different way: the members of the unit prepare the financial and economic reconstruction of a free Hungary and the members of the diplomatic observers prepare diplomatically our liberation.

This does not mean else but to inform me, periodically about the possibilities that Turkey could offer to us in this regard, in particular: what could be done and what should be done in order to promote Hungary's case in Turkey. So any assistance would be gratefully accepted; this means newspaper-articles, promotion of relations between the Hungarian Union and persons interested in Hungary, change of opinions and the like. I wish to point out that we are anticommunists, that we do not form any society, association, etc. and that we are completely independent and do not accept material aid from any political group.

As I have no contact with Hungarians residing in your country I would be very thankful to you for your reply even in a negative case; but in this case I also would be thankful to you if you could indicate to me a suitable person who would be in the position to co-operate.

Looking forward with keen interest to your reply,
I am, dear Professor,

very sincerely Yours
István Nazir Foyta
vice-president Hung. Union
